

Ransomware is an **unavoidable threat** which continues to skyrocket in frequency in 2022. A ransomware attack means: lost revenue, business downtime, recovery, reputational damage, and likely people losing their jobs.

"Ransomware is worsening, even more so than we predicted," warns Acronis

Every **11** seconds
a business fell victim to a
ransomware attack

Complimentary to any EDR and other security tools, **Canauri provides Ransomware Detection & Response (RDR)**. This additional layer of security is critical to any security stack to combat this unavoidable threat.

Detects and stops
ransomware in
milliseconds

Very accurate
detection on
ransomware attacks

Quick and easy
installation, typically
less than 4 hours

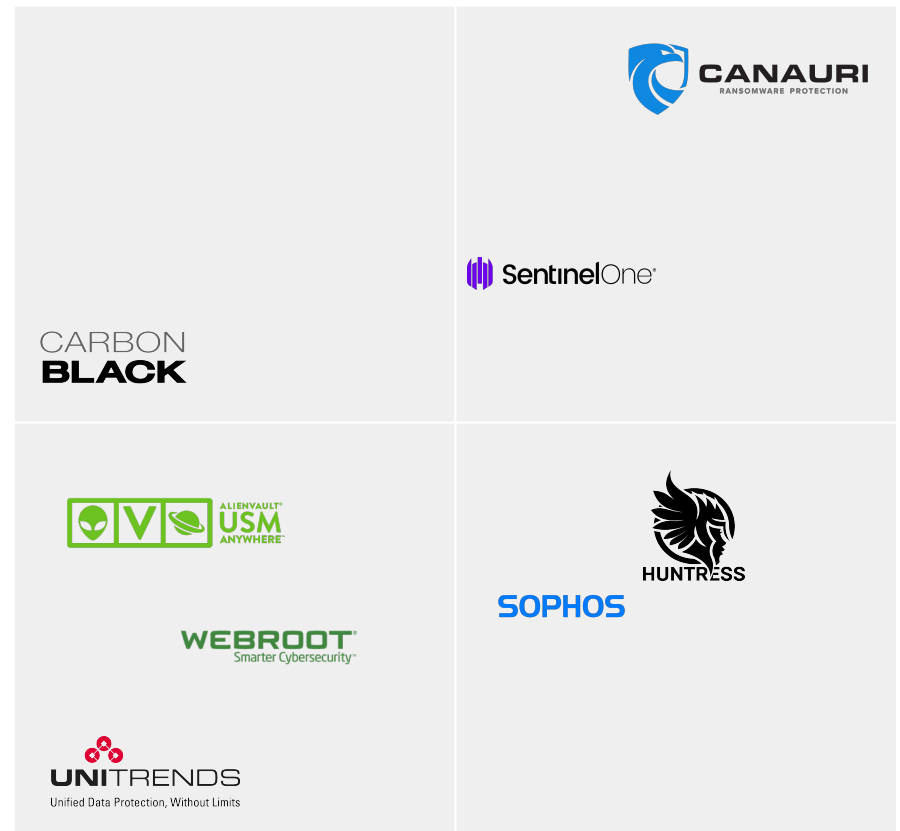

Immediately isolates
device to prevent
spread
